AMO Programme joins Celebration on International Day of Play 2026

AMO Programme joined the Ministry of Education and partners including Sabre Education, Right To Play, and Lively Minds to commemorate the International Day of Play.

The event highlighted the importance of children's right to play and the role of play-based learning in improving educational outcomes. Children participated in a variety of games and activities and had the opportunity to interact with AMO Learning Materials. The celebration reinforced the message that learning becomes more effective when children are encouraged to explore, play, and discover.

Education And The Impact Of AMO Programme Introduction Of Dr. Mrs. Phyllis Agyeman Nyarko - Member Board Of Governors

Dr. Mrs. Phyllis Agyeman Nyarko, Principal of Abetifi Presbyterian College of Education, praises AMO Programme for its contribution to teacher education and early childhood learning.

According to Dr. Agyeman Nyarko, AMO's educational materials have enhanced teaching and learning within the college's Early Childhood Education Centre, making lessons more engaging and interactive. She also commended the organisation's commitment to teacher development through training and capacity-building initiatives.

She noted that AMO Programme's emphasis on creativity, active learning, and practical teaching aligns closely with the college's mission of preparing innovative and competent educators.

Child Development Centre In Asakraka Introductory Workshop on AMO Learning Materials.

AMO Programme recently trained teachers and volunteers from the Child Development Centre in Asakraka, following their purchase of AMO Learning Materials.

The training focused on practical ways to integrate the materials into classroom activities and promote active, child-centred learning. Participants engaged in demonstrations and gained hands-on experience using the materials to enhance learner participation and understanding.

Participants left the training inspired and eager to apply their new skills in the classroom. They were equipped with greater confidence and practical knowledge and better positioned to create engaging learning experiences for children. Children then will participate better, explore and discover more, as they learn in an active way.

Interns at AMO Programme: Sharing Exciting Experiences

Over the past three months, AMO Programme hosted eleven (11) interns from Nsoatre Technical School and Abetifi Technical School, providing them with valuable hands-on learning experiences.

The interns were particularly fascinated by how wood is transformed into educational learning materials, a different experience from the furniture production they are accustomed to in school. They expressed gratitude for the opportunity and pledged to share their experiences with others.

Asiedu Vincent expressed "This internship gave me my first opportunity to work with machines, which I am excited about." The work allowed him to apply the theories learned in school to real-life situations. He described the experience as educational and rewarding.

Afram Augustine noted: "Beyond gaining practical skills, the daily morning devotions helped me to improve my confidence and public speaking abilities and I am happy about that." He described AMO Programme as a supportive environment where staff willingly offer guidance and encouragement.
